

- 
- The screenshot shows a terminal window with a title bar that reads "NetBSD 3.0.1". The window contains a shell prompt "buffer\$". The command "NEAR3 SPEECH and '704'/\$.ccis. and @ad<'19991004" and network" has been entered and is currently displayed on the line following the prompt. The terminal has a standard Unix-like interface with a title bar and a scrollable text area.
